Part 2b. Description of Role with Payment Cards (ROC Sections 2.1 and 3.1)

Describe how the business stores, processes, and/or transmits account data.	The entity does not store, process or transmits account data. The entity is a hosting provider, offering colocation, power and compute to customers. The entity is not involved in the systems management of the customers' resources, but provides a platform where customers can deploy their own servers, workloads and containers.
---	--

Describe how the business is otherwise involved in or has the ability to impact the security of its customers' account data.	The entity is responsible for the underlying virtual service, including the virtualization and storage of data. The entity does not have direct access to the resources of customers, but is responsible for the network security and monitoring.
Describe system components that could impact the security of account data.	The hypervisors contain the virtual network switches and provide a virtual console to the customers resources. The network devices segment the network and provide the segmentation that separates customers' environment from each other and from the management layer.

Part 2. Executive Summary *(continued)*

Part 2c. Description of Payment Card Environment

Provide a high-level description of the environment covered by this Assessment.

For example:

- *Connections into and out of the cardholder data environment (CDE).*
- *Critical system components within the CDE, such as POI devices, databases, web servers, etc., and any other necessary payment components, as applicable.*
- *System components that could impact the security of account data.*

The entity operates a virtual platform. All hardware is owned and maintained by the entity. The environment consists of a virtualisation layer that spans multiple datacenters.

Using a dashboard, customers can order and deploy resources, which may be used for storage of account data. The entity does not have access to the customers resources.

The entity maintains the network, the virtualisation layer and the dashboards that customers use for ordering and maintaining their service.

Indicate whether the environment includes segmentation to reduce the scope of the Assessment.

(Refer to the "Segmentation" section of PCI DSS for guidance on segmentation)

☒ Yes ☐ No

Part 2d. In-Scope Locations/Facilities (ROC Section 4.6)

List all types of physical locations/facilities (for example, corporate offices, data centers, call centers and mail rooms) in scope for this Assessment.

Facility Type	Total Number of Locations (How many locations of this type are in scope)	Location(s) of Facility (city, country)
<i>Example: Data centers</i>	3	<i>Boston, MA, USA</i>
Datacenters	2	Amsterdam, The Netherlands Haarlem, The Netherlands

Section 3 Validation and Attestation Details

Part 3. PCI DSS Validation (ROC Section 1.7)

This AOC is based on results noted in the ROC dated *(Date of Report as noted in the ROC 2025-11-10)*.

Indicate below whether a full or partial PCI DSS assessment was completed:

- ☒ **Full Assessment** – All requirements have been assessed and therefore no requirements were marked as Not Tested in the ROC.
- ☐ **Partial Assessment** – One or more requirements have not been assessed and were therefore marked as Not Tested in the ROC. Any requirement not assessed is noted as Not Tested in Part 2g above.

Based on the results documented in the ROC noted above, each signatory identified in any of Parts 3b-3d, as applicable, assert(s) the following compliance status for the entity identified in Part 2 of this document *(select one)*:

☒ **Compliant:** All sections of the PCI DSS ROC are complete, and all assessed requirements are marked as being either In Place or Not Applicable, resulting in an overall **COMPLIANT** rating; thereby Tilaa BV has demonstrated compliance with all PCI DSS requirements except those noted as Not Tested above.

☐ **Non-Compliant:** Not all sections of the PCI DSS ROC are complete, or one or more requirements are marked as Not in Place, resulting in an overall **NON-COMPLIANT** rating; thereby *(Service Provider Company Name)* has not demonstrated compliance with PCI DSS requirements.

Target Date for Compliance: YYYY-MM-DD

An entity submitting this form with a Non-Compliant status may be required to complete the Action Plan in Part 4 of this document. Confirm with the entity to which this AOC will be submitted before completing Part 4.

☐ **Compliant but with Legal exception:** One or more assessed requirements in the ROC are marked as Not in Place due to a legal restriction that prevents the requirement from being met and all other assessed requirements are marked as being either In Place or Not Applicable, resulting in an overall **COMPLIANT BUT WITH LEGAL EXCEPTION** rating; thereby *(Service Provider Company Name)* has demonstrated compliance with all PCI DSS requirements except those noted as Not Tested above or as Not in Place due to a legal restriction.

This option requires additional review from the entity to which this AOC will be submitted.

If selected, complete the following:

Affected Requirement	Details of how legal constraint prevents requirement from being met
